

**Dear EPAM Team,**

I'm excited to apply for the Automated Testing in .NET program because it feels like the perfect intersection of what I already know and what I want to become.

I've been programming long enough to understand the logic and beauty of writing clean code – the curiosity and a healthy obsession with “how can this break and how do we prevent it?”. That's why this program fits me so naturally. It gives me the opportunity to turn my existing skills into something sharper.

**Why we are perfect match?**

I learn fast and enjoy solving problems.

I'm consistent and persistent – former national gymnast; discipline is literally part of my wiring.

I work well in structured environments but stay creative when finding solutions.

I'm positive and team-oriented – I believe people do their best when the environment supports them.

The step-by-step structure matches how I learn best: focused, guided, and practical.

The emphasis on mastering C# is a direction I want my technical path to take.

The mix of testing fundamentals, automation frameworks and real-world tasks is exactly the foundation I need to start strong in the IT industry.

The mentor-led approach gives me the chance to grow not only technically, but professionally.

I'm not applying just to “take a course”.

I'm applying because I want to become truly good at this – someone who can automate confidently, think critically, and bring value to a team. And I believe EPAM is the right place to build that version of myself.

Thank you for considering my application.

I'm ready for the effort, the challenges and the learning curve – and I'm genuinely excited for the possibility to grow with EPAM.

**Warm regards,  
Lachezara Stamova**
